# Perfect Cube & Temperature Range Chart

## What is Perfect Cube?

Pactiv has embarked on the Perfect Cube initiative to reconfigure all products to fit into a GMA pallet specification of 40" x 48" x 50". Pactiv customers will see faster unloading, reductions in driver retentions, labor productivity savings, improved warehouse storage, and a reduction in shortages or damaged goods.

### What might be different?

- Product piece counts per case\*
- Case dimensions\*
- Orders will need to be placed in unit quantities\*

\* Please note that not all items in this catalog have been reviewed for Perfect Cube. More items were still being reviewed by the time of publication. Any changes will be included in the next catalog edition. Please contact your Pactiv Sales Representative or Customer Service Representative for more details.

## Recommended Temperature Range Chart For All Material Types

	- 40°F / -40°C <span style="float: right;">400°F / 204°C</span>						
	Blast Freezer	Freezer	Chilled Refrigerated	Room Temperature Display	Heated Display	Microwave	Oven
PP	0°F / -18°C						250°F / 121°C
Aluminum	-20°F / -29°C						400°F / 204°C
Pressware	-40°F / -40°C						400°F / 204°C
OPS	20°F / -7°C					180°F / 82°C	
PS Foam	0°F / -18°C					150°F / 66°C	
PET	-20°F / -29°C					120°F / 49°C	
HIPS	0°F / -18°C					180°F / 82°C	
DLPS	0°F / -18°C					180°F / 82°C	
OneCup	0°F / -18°C					180°F / 82°C	
Molded Fiber	Freezer						Microwave Reheating

These guidelines are supplied to assist you in determining the proper use of Pactiv products. They are based upon testing and published guidelines and are reliable in most applications. However, because every food supplier's recipes, ingredients, processes and supply chain is unique, these guidelines are not a substitute for product testing. Confirmation of product acceptability under your specific conditions of use must be done by you.

# Pactiv's Environmental Sustainability Snapshot

**Vision** – Minimize Impacts | Offer Customer Choice | Provide Honest & Accurate Information

**Priorities** – Operations | Products | Post-Consumer Use

## Operations

### Materials Management

- Develop new processes and sources that allow us to use fewer or alternative materials.
- Offer products that include material made from plants, sugar cane, bamboo, corn, pulp fiber and other renewable and sustainable resources.
- Process recycled PETE at our in-house recycling center in West Virginia.

### Energy Efficiency

- Use energy as efficiently as possible and reduce our overall consumption.
- Turn it off, turn it down, or re-engineer a process to conserve energy.
- Use variable speed motors and drives to improve operational control of pumps, blowers, air compressors, fans, and extruder motors.
- Converted facilities to more energy-efficient lighting.

### Reduce and Reuse Waste

- Recycle the majority of our plastic manufacturing process scrap directly back into our products.
- Contract with suppliers and recycling services to recycle aluminum, corrugated boxes, oils, scrap metals and remaining plastic scrap.

### Storage and Transportation

- Strategically locate warehouse network near our customers.
- Logistics program reduces empty space on trucks when shipping products to customers and other company locations resulting in 10 to 15 percent more product shipped in the same number of trips.
- Warehouse lift truck trip management and use of battery-operated lift trucks saves energy, allows for more efficient loading and reduces product damage.

## Environmental Management

- Zero environmental issue mindset with supporting environmental management systems helps ensure operations have no adverse environmental impacts on local communities and comply with all regulatory requirements.

## Products

- Invested more than \$20 million in sustainable product development, manufacturing and product introductions in 2010.
- Introduced new EarthChoice® brand of nearly 90 packaging products that includes options with sustainable and renewable resources, reduced amounts of plastics, less fossil fuel needed to manufacture, post-consumer recycled content, certified compostable and chlorine free processing.
- Aggressively engage with partners to explore and potentially develop commercially feasible solutions to manage post-consumer waste of disposable food service packaging.

Environmental responsibility goes beyond marketing claims of using post-consumer waste or declaring one material more environmentally-friendly than another.

At Pactiv, from purchasing raw materials to delivering finished products, we consider the environmental impact of our products and processes.

John McGrath  
President & CEO

# Pactiv Customer Innovation Center

Pactiv is proud to announce the relocation of our Customer Innovation Center (CIC) now located in Bedford Park, IL. The company's growth and the continued need to provide superior customer focused innovation has led to the opening of the new facility. The space will house the award winning design team as well as a State of the Art prototyping facility. The CIC provides a collaborative approach to customer solutions in one place; from industrial design and market research to tool design and tool fabrication. The expansion will build on Pactiv's legacy of providing customers with innovative solutions for custom packaging needs.

The Customer Innovation Center expands Pactiv's ability to add value to our customers by partnering with them on custom designs. In order to optimize speed to market, the Center will take prototyping

from a single shift to 24 hours a day operation. The Center will Enable Pactiv to support development projects large & small with thermoforming pilot lines dedicated to meeting the needs of our growing customer base. The CIC is close in proximity to several premier Pactiv manufacturing facilities that demonstrate our capabilities ranging from Thermoforming, Injection Molding, Printing and High Speed Automation.

## Capabilities include:

- Creative Problem Solving/Ideation Sessions
- Concept Development
- Market Research
- Rapid Prototyping
- Product Testing & Validation
- Dedicated Thermoforming Pilot Lines
- Tool Design & Fabrication
- Multiple Material Solutions
- Supply Chain Optimization

# Material Resources

## PLA (Polylactic Acid)

PLA is a natural plastic material called Ingeo™ which is made from plants instead of oil. It is 100% annually renewable. Because PLA is a natural material, it is best used for cold applications and has a heat tolerance of 105° F. All Pactiv PLA products are **ASTM D 6400** certified and compostable.

## PLA Coated Paper Hot Cups & Soup Cups

Polylactic Acid Coated Paper is used for Pactiv's compostable hot cups and soup cups. While PLA is used for cold applications, when the PLA film is applied to paper such as our hot cups and soup cups, the PLA film takes on the properties of the paper and therefore does not melt or deform. Pactiv's PLA Lined/Coated Paper Cups are made from 100% annually renewable resources and is **ASTM D 6868** certified, compostable and chlorine free.\*

## Fiber Blend Hingeware

Pactiv's Fiber Blend Hingeware is made of a blend of pulp fibers. All the materials in the Fiber Blend Hingeware are made from sustainable, renewable resources and are **ASTM D 6868** certified, compostable, and processed chlorine free.\*

## Bagasse Blend Tableware

The Bagasse Blend Tableware is a fiber (paper) material that is made of a blend of Bagasse (Sugar Cane) and Bamboo which are sustainable and annually renewable resources. Pactiv's Bagasse Blend Tableware is **ASTM D 6868** certified and compostable.\*

## PSM (Plastarch Material)

PSM is manufactured from starch and a blend of several other materials. The base material comes from a starch that is modified in order to obtain heat resistant properties. Since PSM is derived from corn, which is an annually renewable resource, this material can handle temperatures up to 200° F making it perfect for higher heat applications.

**TFPP (Talc-Filled Polypropylene)** - TFPP contains an average of 40% less plastic polymers than standard polypropylene containers which reduces plastic usage.

**Recycled PET (Recycled Polyethylene Terephthalate)** - PET is made primarily from natural gas feedstock, whereas RPET is produced from previously used post consumer/post industrial plastic products. Pactiv uses a minimum of 25% recycled content in RPET packaging.

\*Disposable compostable products are recommended only for industrial or municipal compost facilities. For a complete list of facilities near you visit [www.findacomposter.com](http://www.findacomposter.com)

EARTHCHOICE® RPET Hinged Lid Containers

**Contains a Minimum of 25% Recycled Content**

## Recycled PET SmartLock® Hinged Deli/Bakery Containers

FEATURES	BENEFITS
SmartLock® Closure System	Easy to lock, aids in employee efficiency
Audible Click Closure	Indicates a secure lock which helps maintain freshness
Smooth Panel Areas	Provides ideal label placement
Variety of Popular Sizes	Useful for a broad range of applications
RPET Material	Crack resistant; offers extended use for low temperature applications

\*This product is not compostable

## Recycled PET Hinged Deli Containers

RPET Material	Provides excellent clarity and freezer performance
Hinged Lid	Eliminates lost lids, saves storage space and reduces inventory costs
Leak Resistant Closure	Prevents messy leaks and spills
Textured Lift/Hold Tab	Allows easy opening
Variety of Sizes	Ensures you can choose the right container for your application
Label Panels	Allow for pricing, nutrition and preparation labels
Excellent Clarity	Promotes impulse purchases
Ribbed Sidewalls	Help prevent crushing while also improving stacking performance

\*This product is not compostable

Classic Carry-Out™ containers are microwaveable under the proper conditions: the container must not touch the side walls of the microwave; it must not be covered with aluminum foil; it must be at least 2/3 full of food. Do not use in ovens manufactured pre-1980. See pages 61-63 for other Pactiv dual-ovenable products.

Do Not Use **PRESSWARE®** Containers In Toaster Ovens.

### Guidelines for the use of **PRESSWARE®** dual-ovenable pizza trays

1. Only the pizza and the paper tray should go in the oven.
2. Only use regular, full size gas or electric home ovens.
3. Pre-heat the oven to the set temperature BEFORE putting the pizza in the oven.
4. The oven set temperature may be up to 425° F.
5. The maximum time for baking is 30 minutes.
6. Always place the pizza tray on the middle rack position.
7. Bake only one pizza at a time.
8. Use oven mitts or pads to remove the baked pizza from the oven.

## Clear Advantage™ Lidding Film – Unprinted, Die Cut, Perforated Tear Sheets on 3” Core Roll

### APPLICATIONS

Foodservice	Tray lidding for in-store prepared foods: on-site/take-out consumption.
Commissary	Off-site prepared food item tray lidding.
Packer/Processor	Retail/Institutional frozen food tray lidding without folding carton.

### Features

### Benefits

Ovenable Film	
Conventional Oven	Can be used in conventional oven up to 400°F for up to 60 minutes.
Microwave Oven	All commercial or residential oven ratings up to 1000 watts.
Freezer Ready	Can be used in quick-freeze commercial freezers down to -40°F.
Pealable Seal	
Dupont® Mylar® Film	
100 OLAFT	No need to puncture or separate from tray before cooking. Film is easily stripped away after cooking.
150 OLAFT	Extra thickness for puncture resistance and large tray application.
Merchandising Appeal	Tamper evident, clear lidding film “window” for optimum food visibility. Optional custom printed graphics capability (Microwave use only).
Profile Cut	Custom die-cut to contour tray top-out dimension.
Packaging Convenience	Individual perforated tear sheets on 8” diameter roll. Each roll is boxed for sanitation and protection in shipping.
Machine Application	Table-top PBS8 Lidding Machine with custom tray carriers.
Economical	Less expensive when compared to OPS or windowed board lid options.
Leak Resistant	Prevents spillage of most liquids for take-out applications.

## 3000 Linear Foot Roll Lidding Film – 3000 Linear Feet of Film on 3” Core Roll

### APPLICATIONS

Foodservice	Take-out package lidding.
Commissary	Freezer ready, bulk prepared food tray lidding.
Packer/Processor	Retail/Institutional frozen food tray lidding with folding carton.

### Features

### Benefits

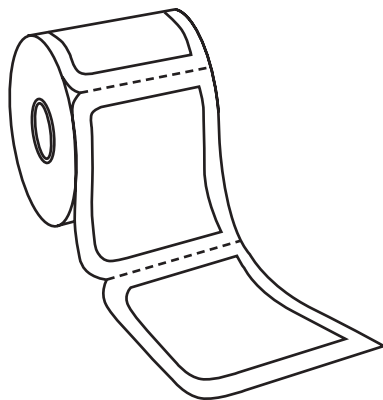

Ovenable Film	
Conventional Oven	Can be used in conventional oven up to 400°F for up to 60 minutes.
Microwave Oven	All commercial or residential oven ratings up to 1000 watts.
Freezer Ready	Can be used in quick-freeze commercial freezers down to -40°F.
Pealable Seal	
Dupont® Mylar® Film	
50 OL2 Film	No need to puncture or separate from tray before cooking. Film is easily stripped away after cooking.
50 RL42 Film	For use when more aggressive seal is needed or applying to CPET or PP trays.
Packaging Convenience	3000 linear feet vs. standard 7,000 to 8,000 ft. rolls from film converters. Each roll is boxed for sanitation and protection in shipping.
Machine Application	AFS-10 manually operated film sealer or most automated sealing equipment.
Economical	Less expensive when compared to OPS or board lid options.
Leak Resistant	Prevents spillage of most liquids for take-out applications.
